READER PATHWAY / REGULATORY

Regulatory assessment pathway

A structured regulatory and privacy review index, identifying applicable decision points without claiming recognition or approval.

Edition 2.0 · 23 October 2026 · Educational/public explanatory documentation · No public investment offering or approval claimed

Scope and legal classification come before product language

For each business activity, identify the actual entity, jurisdictions, prospective customer or investor, economic substance of what is transferred, custody model and payment flows. Neither “DCO”, “exchange”, “data share”, “ledger proof” nor “licence” determines regulatory treatment. The applicable regulator and qualified counsel must assess actual activities and securities classifications. This public document is an assessment index, not a regulatory filing or assertion of permission.

Activities requiring separate analysis

Activity	Primary questions	Evidence or controlling record
Data intake through Bridge	Consent, purpose, authority, third parties, retention, cross-border transfers	PIPA/data protection mapping, notices, contracts, connector tests
Commercial data/ software rights	Chain of title, source restriction, contract enforceability, consumer protection, tax	Rights Passport and enforceable underlying agreements
Issuer formation and security distribution	Actual security class, offering terms, prospectus/exemption, eligibility and reporting	Corporate register, counsel opinion, official offering document, distribution record
Order matching/ venue operations	Recognition/registration/exemptions; applicable marketplace requirements; surveillance and conflicts	Specific regulator decisions and NI 21-101/23-101 analysis where applicable

Activity	Primary questions	Evidence or controlling record
Dealer and advising activity	Registration or exemptions under NI 31-103 and related obligations	Registration status, controls, suitability/know-your-client where applicable
Client money and clearing	Custody, payment services, anti-money laundering obligations, reconciliation	Provider agreements, banking/ custody proofs, cash controls
Youth community workshops	Child protection, consent, operator status, records and insurance	Host approvals, screening, guardian consent and incident procedures

Regulatory evidence file checklist

1. Named legal entity and accountable control persons; versioned functional business description.
2. Jurisdiction/target-client and security-classification memorandum prepared by counsel.
3. Data flow maps, privacy notices, contract and Indigenous data-sovereignty analysis where relevant.
4. Marketplace/dealer/custody analysis with citations to current rules and regulator contact records.
5. Architecture and segregation of personal, research, trading and issuer records.
6. Threat model and independent security testing with scope, date, assessor and exceptions.
7. Issue and incident management, conflicts, market abuse prevention, complaint handling and retention.
8. Financial condition, client-funds custody, reconciliation, settlements and independent audit evidence.
9. Release gates tying representations in consumer pages to actual authorizations.

Current evidenced status and immediate non-conclusions

Local engineering tests exist for several components. They do not establish independent three-host qualification, production account/connector privacy controls, compliant financial services, live securities issuance or recognized public market operations. The system is a project for technical and legal evaluation. Do not infer that the British Columbia Securities Commission, Canadian Securities Administrators, CIRO or another regulator has approved BTG.
