BOUNDARY TECH GENERATION / AGES 9–11

Level 2 — Young Builders

A complete eight-session pathway for ages 9–11: projects, teaching steps, evidence, tools and child-safety boundaries.

Edition 2.0 · 23 October 2026 · Educational/public explanatory documentation · No public investment offering or approval claimed

What this level is designed to teach

Young Builders is the proposed programme for 9–11 years, with 65–75 minutes guided sessions. Teaching priorities: Events, loops, pair debugging, simple robot path. By the end, the learner should be able to present a project such as three-level game; quiz app; obstacle robot, and explain at least one problem they solved.

Eight-session progression and evidence

Week	Theme	Age-appropriate deliverable
1	Imagine and start	Sketch level order and first player
2	Build the world/interface	Build three challenge scenes or home screens
3	Control and response	Add events/loops and player action
4	Rules and objectives	Add points/quiz conditions and success checks
5	Feedback and accessibility	Add instructions/contrast/accessibility
6	Find and fix defects	Partner playtest; record and fix one bug
7	Prepare a version	Save named version; check restart
8	Private showcase	Demonstrate game/app/robot in pairs

Allowed tools and safety boundaries

Scratch desktop/managed Scratch; optional micro:bit MakeCode; simple adult-supervised low-voltage robot in pairs. No public social accounts.

Finished project acceptance

- Runnability on the approved workshop device.
- An original child-made idea or improvement that the learner can explain.
- At least one recorded or explained test, including what was expected.
- One adjustment made because of feedback or a defect.
- Local safe project packaging and only opt-in guardian-approved private sharing.

Facilitator and guardian notes

Age is a default placement guide, not a test of worth or ability. The host and parent can choose accommodations, quiet presentation and slower pace. A workshop is not independent childcare, a credit-bearing qualification or a commercial data contribution. The original blueprint is a proposal: there are no confirmed dates, named registered students or verified screening outcomes to publish.
